

Rectifications in the Website

Home Page

1. Add “Mechanical Engineers” to the paragraph “Nextstudy turns civil engineers, architects, and graduates into industry-ready BIM professionals through mentored, project-based training.” In the hero section.
2. After the Hero section, add a section where the company’s recognitions are displayed.

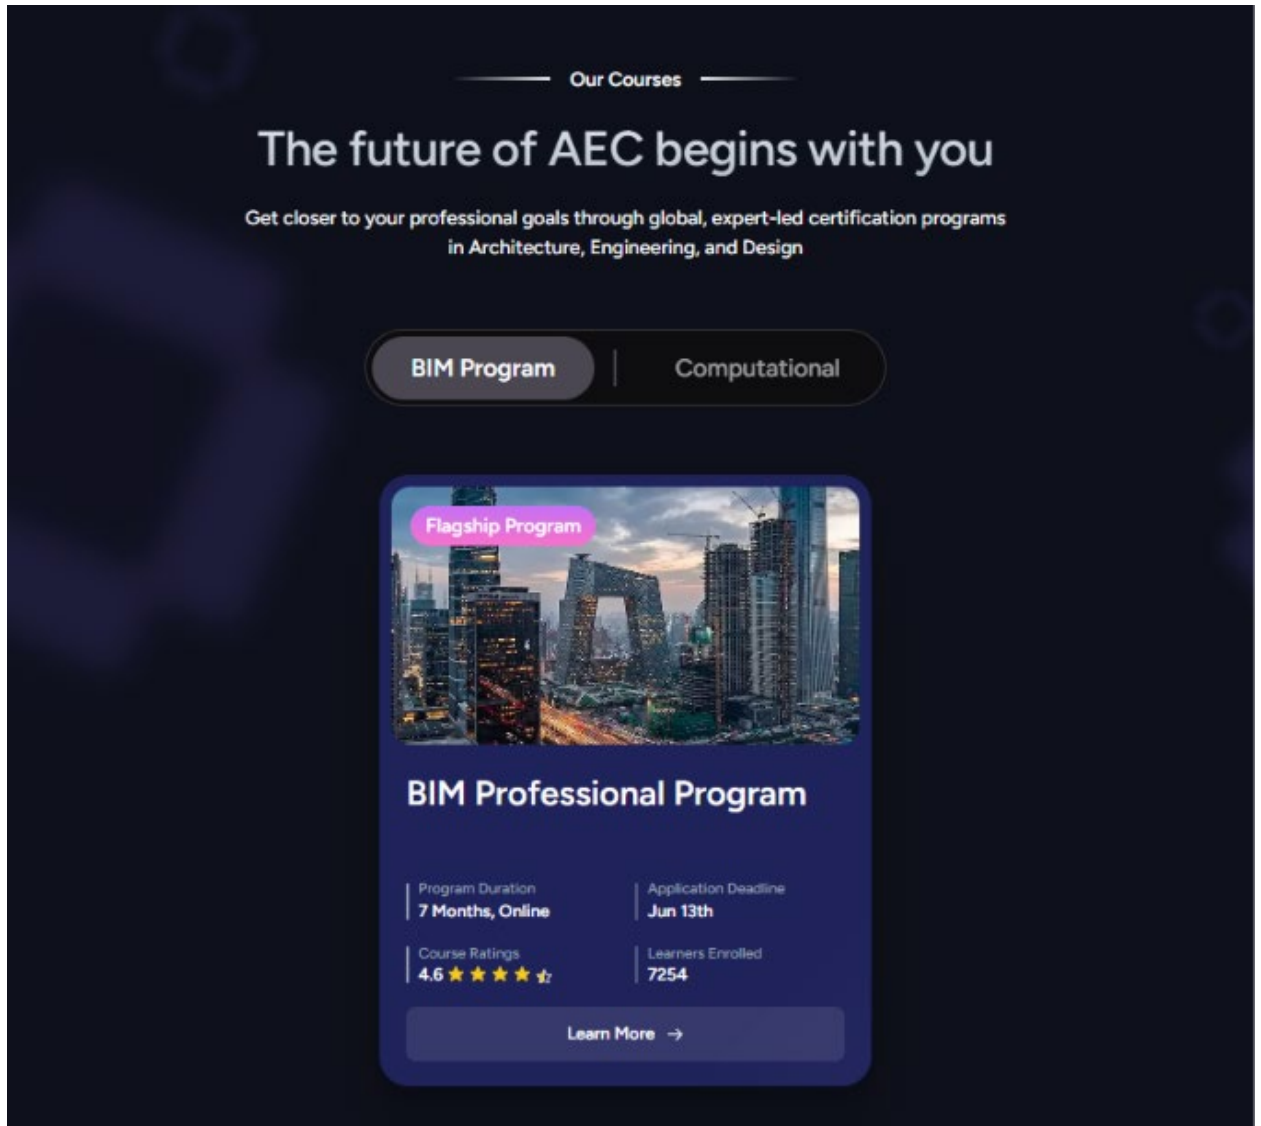

Example from Novatr website:

In our case, we need cars for the follows

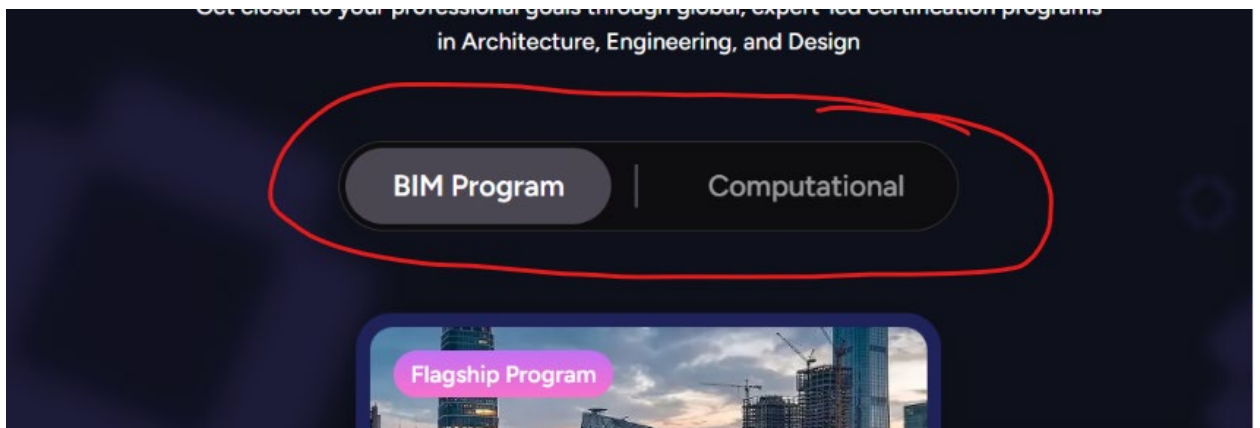

- 01)** Recognized by 150+ AEC companies across India and GCC countries.
- 02)** Top 5 BIM institutes with industry-experienced faculties.
- 03)** Exclusive access to our premium community of 100+ BIM professionals.
- 04)** Best performing BIM institute in India (add a number).

3. Right after the “company recognition” section, our flagship program should be displayed. Our current flagship program is “BIM Foundational Bridge Course”. Example from Novatr website:

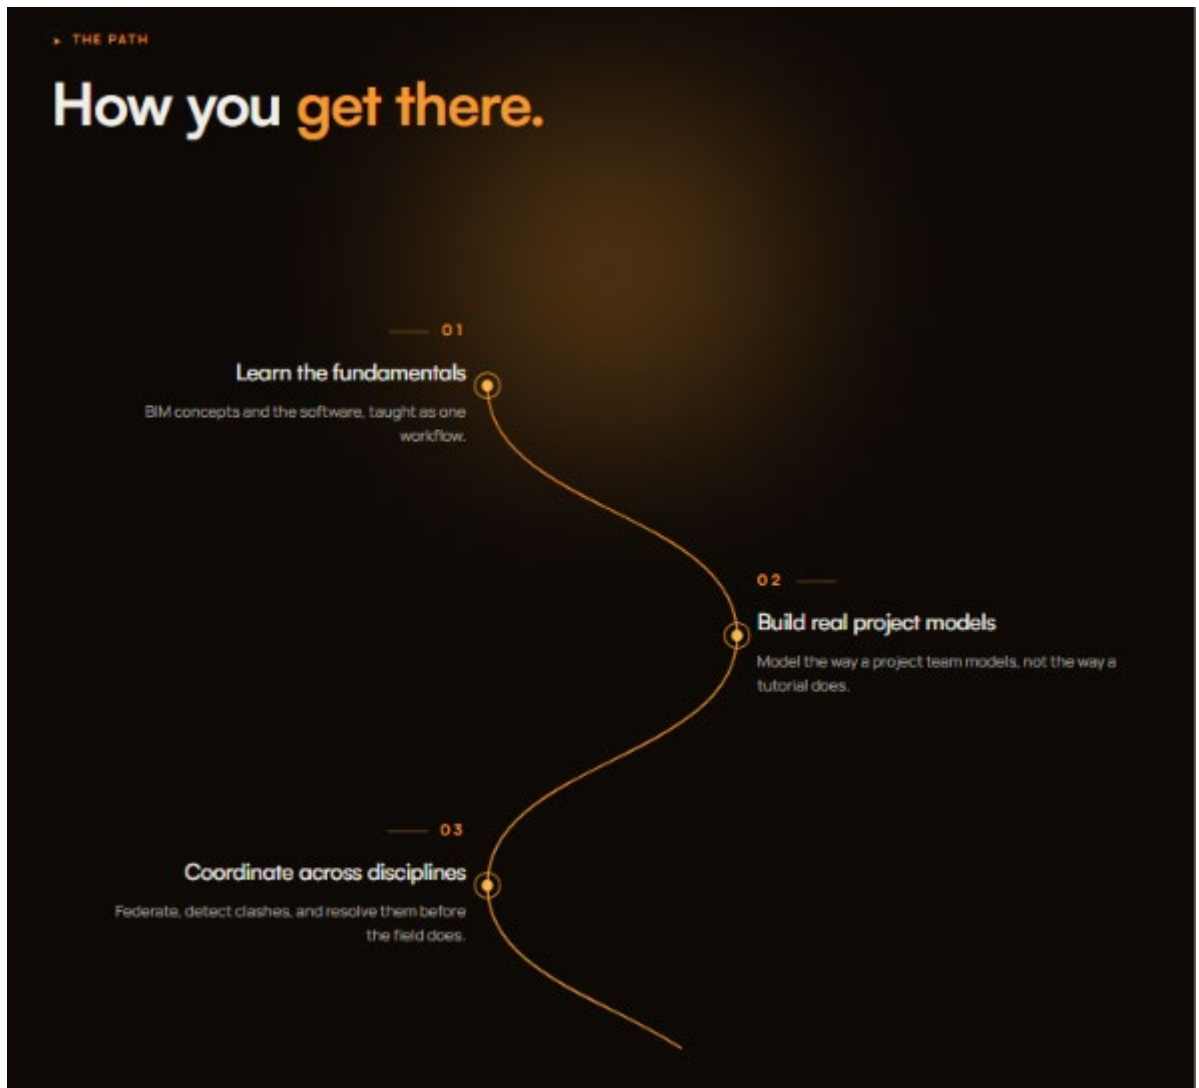

4. The **Flagship program card** in the home page should be having the color of **Nextudy Vibrant Orange** (#f9a11d).
5. In the “Flagship Program” section, there are two buttons on the top (refer to the screenshot from the Novatr website) labelled as “BIM Program” and “Computational”. Retain those two buttons, but label them as “Flagship Program” and “Other Programs” respectively. The “Flagship Program” button should be highlighted with Nextudy Vibrant Orange color (#f9a11d), and the “Other Programs” button should be semi-transparent.

Reference Screenshot from Novatr website:

6. Clicking “Other Programs” button under the “Flagship Program” section should take the view to the “Our Programs” section.

7. “The Path” section should be displayed right after the “Flagship Program” section.

8. After “The Path” section, add “The Gap” section, “Why Nextudy” section and “Why Now” section, in that order.

THE GAP

Your degree got you to the door.
The door wants Revit.

01 THE PROBLEM College taught theory, not Revit.	→	THE FIX You learn the software inside real workflows , the way a project team actually uses it.
02 THE PROBLEM You have never coordinated a live model.	→	THE FIX You run clash detection and federate disciplines on project-style files from week one .
03 THE PROBLEM Your portfolio is empty.	→	THE FIX You leave with coordinated models, drawings, and documentation you can show in an interview .
04 THE PROBLEM BIM job posts need like a foreign language.	→	THE FIX A mentor translates the role, the tools, and the expectations until they stop being mysterious.

WHY NEXTUDY

Built around how
BIM teams actually work.

01

Mentors who ship real projects

You learn workflows from professionals working on real BIM projects, not lecturers reading slides.

02

You build, you don't just watch

Every program is project based. You finish with models and drawings, not a folder of notes.

03

A portfolio that earns interviews

Coordinated models, construction documentation, and clash reports an employer can actually open.

04

The real multidisciplinary workflow

Architecture, structure, and MEP coordination, the way a project team hands work between them.

WHY NOW

The industry changed.
Most education didn't.

Construction moved from disconnected 2D drawings to intelligent, coordinated models that catch conflicts before anyone breaks ground. Hiring followed. The people who can work inside that model are the ones getting the offers.

SCROLL THROUGH THE SHIFT

01

Disconnected 2D drawings

Pipes, sections, and details live in separate files. Coordination happened on site, late, and expensively.

02

One intelligent model

Architecture, structure, and MEP share a single coordinated model. Clash detection in the office, not the field.

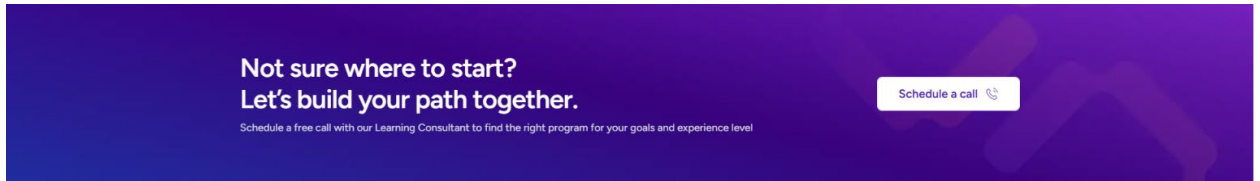

03

Coordinated, clash-free delivery

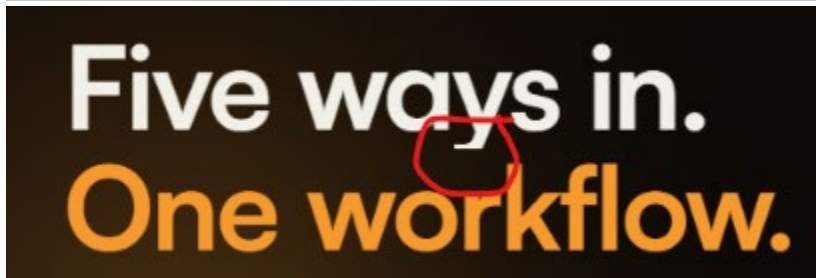

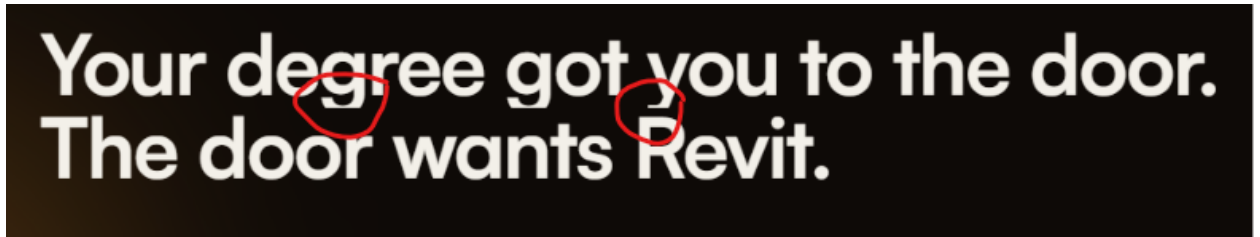

Teams sequence, quantify, and document straight from the model. This is the workflow employers are hiring for.

9. Right after the “Why Now” section, create a CTA ribbon which scrolls down the page to the “Lead Form” section.

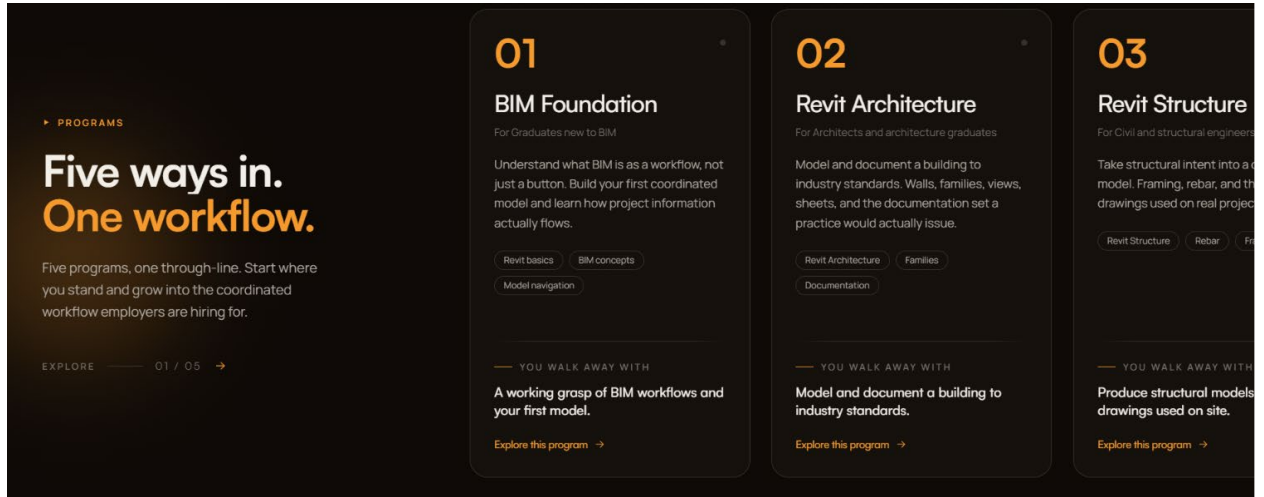

Example from Novatr website:

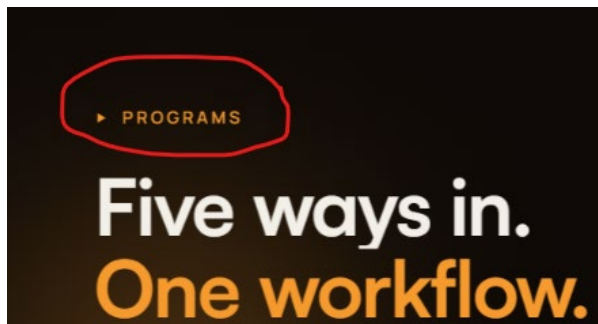

10. Make sure the fonts don't clip off like what is seen here, throughout the website.

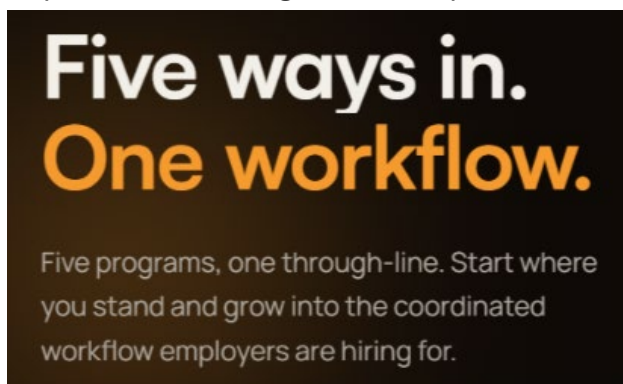

11. After the "Why Now" section, comes "Our Programs" section. This section is the rework of the section given below:

Replace "Programs" with "Our Programs" in this area:

Replace the Heading and the Caption with the following:

Choose Your Growth Journey.

Multiple programs, one destination. Begin where you are and develop the skills, mindset, and industry readiness employers actively seek.

12. In the “Our Programs” section, we have 7 program cards (1 flagship program card and 6 normal program cards) to display in the carousel. They are the follows:

01) BIM Foundational Bridge Course (Beginner to intermediate)

A complete package for graduates new to BIM

From core concepts to practical understanding, start with the fundamentals and build the foundation that prepares you for the world of BIM with confidence. The certification from this degree is a pre-requisite for many advanced level BIM courses provided here.

- i. AutoCAD
- ii. Autodesk Revit
- iii. Navisworks Manage
- iv. Large-scale project
- v. Career training

You walk away with:

A strong and complete BIM foundation with a clear career direction.

02) AutoCAD Fundamentals (Beginner level)

For beginners and graduates

Start with the fundamentals of design and drafting by mastering the essentials of AutoCAD through practical skills used across real projects.

- i. AutoCAD
- ii. Mini project

You walk away with:

Confident drafting skills with industry-ready precision.

03) Revit Fundamentals (Intermediate level)

For Architects, Mechanical and Civil Engineers

Start mastering the essentials of Autodesk Revit and discover how modern buildings are designed with efficiency and precision.

- i. Autodesk Revit
- ii. Mini project

You walk away with:

Practical Revit skills for intelligent model creation.

04) Navisworks Fundamentals (Intermediate level)

For aspiring BIM coordinators

Build the foundational skills to visualize, coordinate, and streamline workflows across construction projects through Navisworks Manage.

- i. Navisworks Manage
- ii. Mini project

You walk away with:

Solid project coordination and model review skills.

05) Advanced BIM Architecture Modeling (Advanced level)

Upskilling program for BIM Architects

Move beyond the basics and fully master architectural BIM modeling techniques and build the expertise demanded by modern BIM mega-projects. This program is not recommended for beginners.

- i. Autodesk Revit (Arch.)
- ii. Essential plugins & agents
- iii. Workflow techniques
- iv. Free- upskilling with Nextudy
- v. Large-scale project
- vi. Career Support

You walk away with:

Advanced architectural BIM skills for real projects.

06) Advanced BIM Structure Modeling (Advanced level)

Upskilling program for BIM Civil Engineers

Take your BIM expertise further with advanced structural modeling workflows built for accuracy and industry relevance. This program is not recommended for beginners.

- i. Autodesk Revit (Struct.)
- ii. Essential plugins & agents
- iii. Workflow techniques
- iv. Free- upskilling with Nextudy
- v. Large-scale project
- vi. Career Support

You walk away with:

Strong structural BIM expertise with practical confidence.

07) Advanced BIM MEP Modeling (Advanced level)

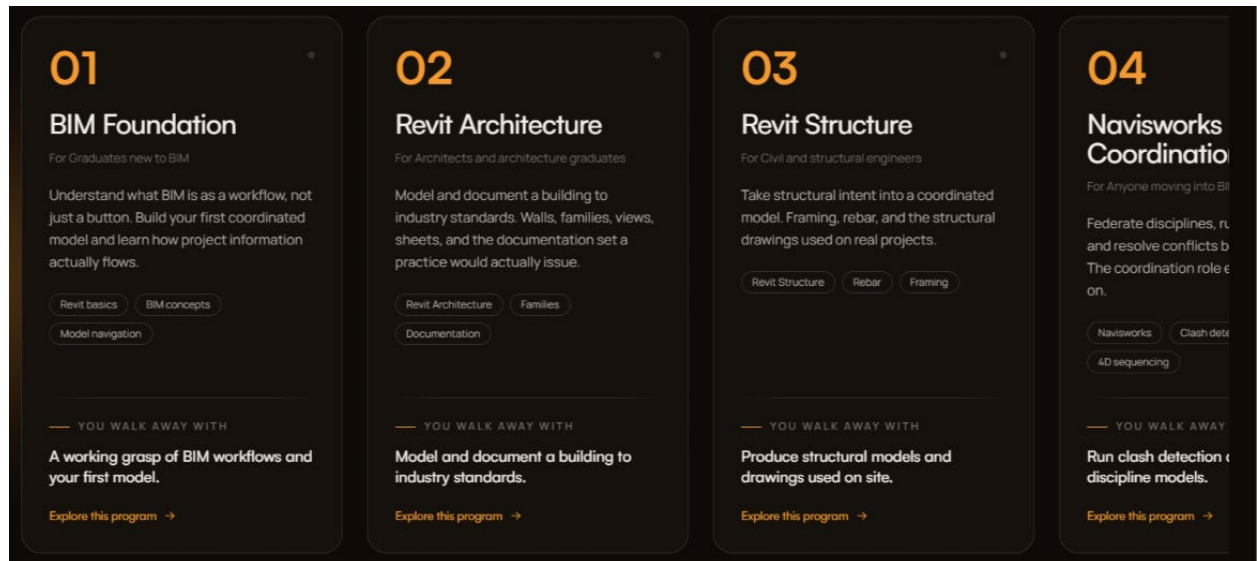

Upskilling program for BIM MEP Engineers

Take your BIM journey further and learn how complex building services come together with advanced MEP skill built for precision, coordination, and project success. This program is not recommended for beginners.

- i. Autodesk Revit (MEP)
- ii. Essential plugins & agents
- iii. Workflow techniques
- iv. Free- upskilling with Nextudy
- v. Large-scale project
- vi. Career Support

You walk away with:

Professional MEP coordination skills for project success.

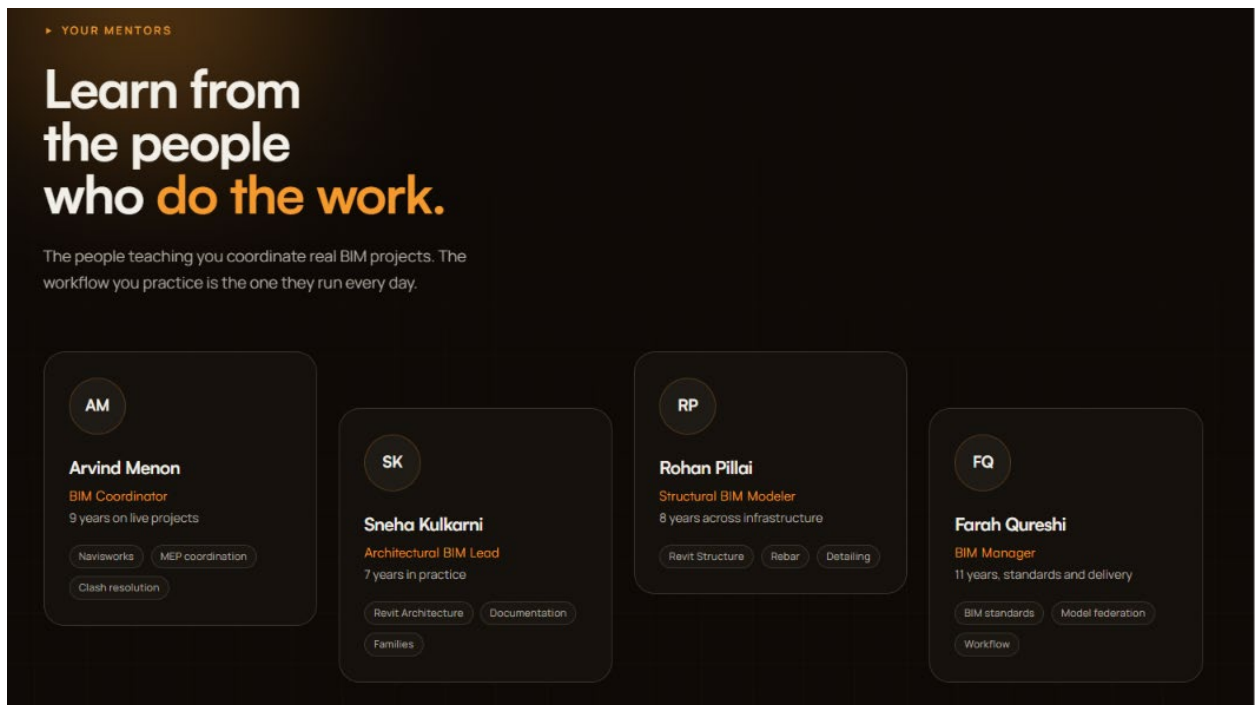

This is the reference of the section to be replaced.

- In the “Our Programs” section, “**BIM Foundational Bridge Course**” is the flagship program card in the carousel; It should be having the color of **Nextudy Vibrant Orange** (#f9a11d).

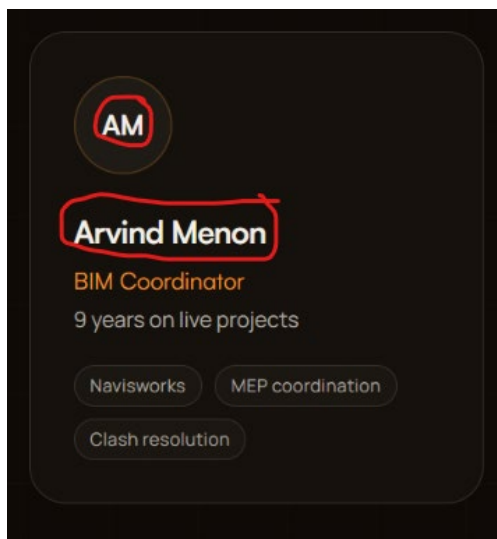

The other 6 program cards are semi-transparent in nature.

- All the program cards in the “Our Programs” section carousel are clickable and should redirect to the “Lead Form” section of the home page once clicked.

15. After the “Our Programs” section comes the “Your Mentors” section

In this, change the name of the mentor from “Arvind Menon” to “Muthuvel Mathivadan” and the initials from “AM” to “MM”, and keep the rest of the details of that card the same.

Let rest of the cards be there as such, for now.

16. The sections after the “Your Mentors” section comes “What you walk away with”, “In their words” sections in that order. Don’t change anything in that.

• WHAT YOU WALK AWAY WITH

Realistic outcomes, stated plainly.

✓ A genuine grasp of BIM workflows	✓ Portfolio-ready project models
✓ Confidence across Revit and Navisworks	✓ An understanding of real coordination
✓ Interview preparation that holds up	✓ The judgement to work inside a team

• No salary promises. No placement guarantees. **Just the capability employers are actually screening for.**

• IN THEIR WORDS

“I could open Revit, but I had no idea how a real project came together. The coordination module is where it finally clicked.”

AR Aishwarya R.
Civil engineering graduate

The mock interviews were brutal in the best way. By the time I sat for the real one, the project questions felt routine. KJ Kiran Joseph Site engineer moving into BIM	I finally have models I am proud to show. That changed how I talk about myself in interviews. NV Nikhil Varma Architecture graduate
---	--

17. After “In their words” section, comes the “Nextudy Elevate” section

This is a new section, which is not there in the first make of the website. This is a section which opens the opportunity to improve the customer retention and repeat purchases. The following is the content for this section:

Introduction paragraph:

“We believe ambitious professionals deserve a learning experience that rewards their commitment to growth.

*Introducing **Nextudy Elevate***

Unlock exclusive benefits designed to accelerate your career growth and maximize every learning opportunity. Become a Nextudy Elevate member and enjoy greater value, bigger savings, and rewards that grow with your journey.”

Make this section have an attractive and a premium look.

Also, add a huge button with the label **“Explore Nextudy Elevate”**, which takes the viewer to a new webpage exclusively for “Nextudy Elevate”.

18. After “Nextudy Elevate” section, comes the “Lead Form” section.

START THE CONVERSATION

Get the course syllabus.

Tell us where you are now. A mentor will walk you through which program fits, what it covers, and what it does not.

☒ No pressure, no script.

Tell us a little
Share a few details and download the BBA Foundation syllabus. A mentor reviews every request personally.

Not happy with your details? Go back to correct the syllabus and trigger a callback.

Here, when you click on the “Type of Inquiry”, you have two options; “Individual” and “Business”.

When you click business and choose an option under “Product / service interest”, we need only 3 options; “Business Collaboration”, “Business Inquiry”, and “Other”.

Product / service interest

What are you interested in? ▾

- What are you interested in?
- BIM Foundation
- Revit Architecture
- Revit Structure
- Navisworks Coordination
- BIM Career Bridge
- Not sure yet

Which means, replace these options with the above 3 options for “Business” category.

For the “Individual” category, replace the options with the following options:

- 01)** BIM Foundational Bridge Course
- 02)** AutoCAD Fundamentals
- 03)** Revit Fundamentals
- 04)** Navisworks Fundamentals
- 05)** Advanced BIM Architecture
- 06)** Advanced BIM Structure
- 07)** Advanced BIM MEP
- 08)** Other

19. After “Lead Form” section, comes the “FAQ” section.

QUESTIONS

**Straight answers,
no script.**

Still deciding where you fit? A mentor will talk through which program suits you, and which doesn't.

[Get the course syllabus](#)

Is Nextudy suitable for complete beginners? ✕

Yes. The Foundation program assumes no BIM background. It starts with what BIM is as a workflow and builds from there.

I'm already working. Can I learn alongside my job? +

Do I need prior Revit or BIM knowledge? +

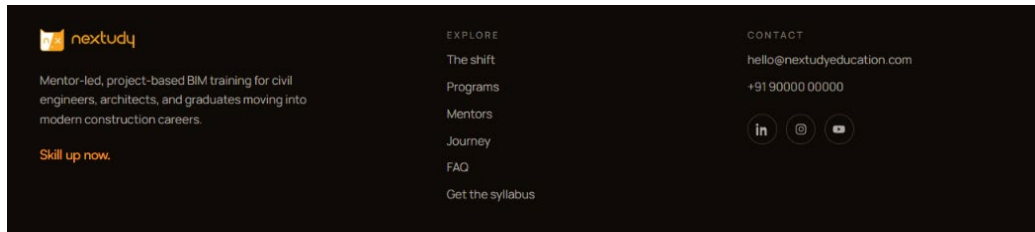

Will I work on real projects? +

Is portfolio support included? +

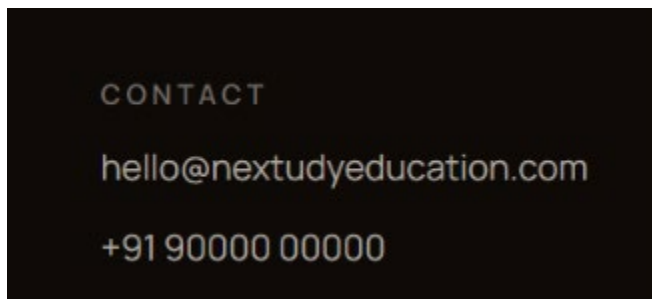

How is this different from a regular software institute? +

There are no changes in this section. Keep it as is.

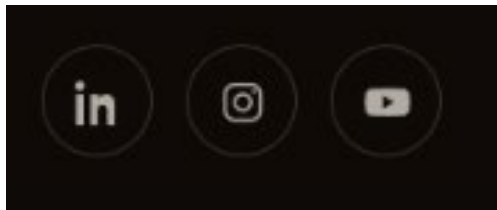

20. After the “FAQ” section, comes the footer of the home page.

Here, only a few changes are required.

First, replace the placeholder email with info@nextudyeducation.com
Secondly, replace the phone number with number [+91 9500832464](tel:+919500832464)

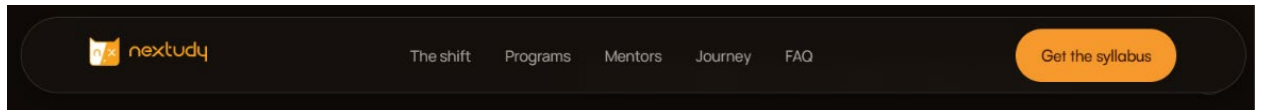

Among the social buttons below the contact details, replace the YouTube button with X app button.

Connect these buttons to the respective handles given below:

- <https://www.linkedin.com/company/nextudy/> - LinkedIn page
- <https://www.instagram.com/nextudyeducation/> - Instagram page
- <https://x.com/NextudyOfficial> - X page

21. In the Header area, add 2 more buttons along with the existing buttons; “About Us” and “Nextudy Elevate” as the first 2 buttons. By clicking these buttons, the viewer should be able to navigate to their respective webpages.

All the above-mentioned rectifications are for the homepage. Hereafter, we will be discussing the additions and modification of the “About Us” and “Nextudy Elevate” pages respectively.

About Us

What is Nextudy?

Nextudy is a career transformation platform built to help individuals prepare for careers that will remain valuable in the evolving job market. Our mission is to continuously analyze market trends and identify high-demand career paths for the coming decade, then deliver quality training through experienced mentors who have real industry expertise. We believe education should not simply teach skills, but create professionals who are prepared to thrive in the industries of tomorrow.

Who are we?

Nextudy was founded by two professionals from different backgrounds who shared a common vision of making career growth more practical, industry-focused, and future-ready. By combining technical expertise, business understanding, and a passion for creating opportunities, they built a platform designed to bridge the gap between learning and real career outcomes.

Jassim Salam | Founder & Director

Jassim Salam is a Civil Engineering graduate from VIT University, Vellore, with more than five years of professional experience as a BIM Engineer and BIM Coordinator. Throughout his career, he has contributed to projects and worked with consultants across South Asian regions, including KEO International Consultants in Saudi Arabia and EKK Infrastructure in India. At Nextudy, he leads business operations,

organizational management, and mentor coordination while ensuring that every program aligns closely with industry needs and practical outcomes.

Fahd Ikbal | Co-Founder

Fahd Ikbal is an MBA graduate with a strong interest in entrepreneurship, business management, and building scalable systems. Prior to Nextudy, he operated "Fraternity," a digital freelancer network designed to connect talented individuals with suitable opportunities in a localized ecosystem. At Nextudy, he drives marketing initiatives and business expansion strategies with the goal of growing meaningful learning opportunities and building stronger industry collaborations.

What we do?

At Nextudy, we focus on transforming learning into real career opportunities through practical, industry-driven programs and support systems. Our approach combines structured training with mentorship and hands-on exposure to help learners build confidence and become career-ready.

We currently provide BIM training programs, mentorship and career guidance, portfolio and resume development support, placement assistance, exposure to industry projects, and corporate training solutions. We also collaborate with academies and training institutions to strengthen their offerings and create wider access to quality education and career-focused opportunities.

Nextudy Elevate

Every meaningful career transformation begins with a decision to keep learning, growing, and staying ahead of change. If you're committed to building a future that stands out, you deserve a learning ecosystem that rewards your ambition every step of the way.

Nextudy Elevate was created for professionals who see learning as a lifelong investment rather than a one-time achievement. The most successful careers are built by those who consistently adapt, expand their expertise, and stay prepared for the opportunities that tomorrow brings. We believe that commitment deserves more than quality training alone, and it deserves a community, resources, and an ecosystem that continuously supports your growth. Whether you're aiming for a promotion, transitioning into a new field, or preparing for the next stage of your career, Nextudy Elevate is designed to keep you moving forward with confidence. Because when your

ambition is matched with the right support system, career transformation becomes a journey of continuous progress rather than a single milestone.

Benefits of Joining Nextudy Elevate

- Training for any program provided by Nextudy can be bought at 30% discount.
- Refer two students who successfully enroll in a program and unlock an 80% (non-stackable) discount on your enrollment in the same program.
- Receive a free Career Yearbook which explores the upcoming global career trends.
- Get priority in enrollment for all programs provided by Nextudy.
- Receive monthly career newsletter to your mailbox
- Avail free resume reviews provided by our career experts once a month
- Attend exclusive career webinars provided by us once in two months
- Access to Nextudy Elevate members-only networking community

Every year you delay investing in your growth is another year someone else builds the skills employers are looking for. Join the professionals who have already chosen to stay future-ready.
